Education

Computer Engineering - 2,79 / 4 Marmara University, Türkiye	**Sep 2018 - Jun 2023**
Computer Science - 3,60 / 4 University of Bielsko-Biala, Poland	**Feb 2022 - Jun 2022**

Employment

IT Intern **Jun 2021 - Aug 2021**
Hayat Holding
As a dedicated member of the IT department at Hayat, I played a role in driving process efficiency through the implementation of Robotic Process Automation (RPA) solutions, specifically leveraging Automation Anywhere for seamless SAP integration. My primary responsibilities included the development and optimization of automated processes aimed at streamlining workflows and enhancing overall operational effectiveness.

iOS Developer Intern **Oct 2021 - Feb 2022**
Türk Telekom
As a key contributor to the iOS product development team at Yaay, a dynamic social media platform, I played a pivotal role in crafting and enhancing the user experience through the effective utilization of SwiftUI. My responsibilities encompassed leveraging SwiftUI software objects, including UI elements, notifications, navigations, views, and pop-ups, to create a seamless and visually engaging interface for our users.

Full-Stack Developer Intern **Jul 2022 - Sep 2022**
Skyland Soft
I played a role in the development of a sophisticated Freelancer Tracking System, showcasing my expertise in a diverse technology stack. I seamlessly integrated Java Spring for robust communication architectures on the backend, utilized .NET for crafting an intuitive web interface, and contributed to the mobile application using SwiftUI. Additionally, I took charge of the graphical user interface (GUI) with React, ensuring a seamless and visually appealing user experience.

Junior Backend Developer **Nov 2022 - Jun 2023**
NTT DATA Business Solutions Turkey
I played a key role in the development and maintenance of robust back-end programs using SAP XSJS with JavaScript. My responsibilities included bug-fixes, data architecture management on the SAP HANA database, and proficient utilization of Microsoft Azure cloud computing. Adhering to agile methodologies, I actively participated in daily team meetings, ensuring effective collaboration and project alignment.

Project Student **Dec 2023 - Mar 2024**
Tüpraş
I bring valuable experience gained over a limited period of time, actively contributing to a team tasked with developing an innovative application portal that serves as a gateway to all internal applications within the company. My role involves disciplined work on the company's established boilerplates, utilizing a technology stack centered around .NET, MSSQL, and React. Embracing agile methodologies, our team conducts regular meetings to ensure efficient collaboration and project alignment.
